

vizExplorer System Requirements

1.0 Introduction

This document sets out the suggested system requirements for a vizExplorer installation*. Questions regarding this document should be directed to your local BIS² representative.

2.0 System Overview

3.0 Client - System Requirements

Hardware (minimum)	Software
<ul style="list-style-type: none"> • Intel® Pentium® 4 processor • 4GB of RAM • 1GB of available disk space • Screen resolution of 1024x768 32bit 	<ul style="list-style-type: none"> • Microsoft® Windows® XP (with service pack 2) or Windows Vista® or Windows 7 • Adobe® Flash® Player 11 • Internet Explorer® 8, or Firefox® 3.6 (or later)

4.0 Server - System Requirements[#]

Hardware (recommended)	Software
<ul style="list-style-type: none"> • 8 CPUs or 8 Cores Intel® vPro™ EM64T or AMD Opteron™ Processor • 16GB of RAM • 900 GB of available disk space 	<ul style="list-style-type: none"> • IBM® HTTP Server 7 & IBM® WebSphere® Server 7.0 or JBoss™ AS 4.3.0 • Google Maps™ Enterprise API • Windows 2008 x64-bit

5.0 Database - System Requirements

vizExplorer operates with most database types. e.g., MS SQL, Teradata, Netezza, IBM, Oracle and Sybase.

<p>Notes:</p> <p>* Actual requirements will vary based on your system configuration, number of users, and the software and features you choose to install. Processor performance is dependent upon not only the clock frequency of the processor, but the number of cores and the size of the processor cache.</p> <p># The server may be physical or virtual.</p>
